

Product features and benefits

- ★ Improves overall SAP system performance and reduces cost by archiving SAP application and BW data as per your ILM Strategy
- ★ Offers BW and BW on SAP HANA Near Line Storage functionality
- ★ Improve user productivity and efficiency of SAP business processes by providing integrated/linked SAP content (ILM)
- ★ Fully scalable from small Archives to Petabytes of storage space
- ★ Meets regulatory and legal requirements for data storage
- ★ CertoStore makes use of the proven MatrixStore object storage system
- ★ No need for expensive and time consuming additional backups: secure Disk based storage with default dual protection and optional remote replication
- ★ SAP Platform and Database independent
- ★ Hardware independent interface
- ★ CertoStore makes use of the proven MatrixStore object storage system
- ★ No need for expensive and time consuming additional backups: secure Disk based storage with default dual protection and optional remote replication
- ★ SAP Platform and Database independent
- ★ Hardware independent interface

CertoStore offers the MatrixStore storage system to SAP customers with a SAP HTTP Content Server interface.

MatrixStore is a highly secure disk-based storage platform designed to protect digital assets in an automated, repeatable and regulated manner:

It is a safe place to protect data and a secure storage platform for all data that need to be archived or stored offline or near line.

CertoStore will lower your Company's total cost of ownership (TCO) by storing your archived data, BW NLS data, documents, etc. on secure disk which does not require to be backed up because of its secure nature.

CertoStore uses the HTTP Content Server Interface which integrates seamlessly with your ILM Strategy for SAP ECC and SAP BW.

MatrixStore offer the following important benefits:

- ★ **Self Healing Clustered Architecture:** Reduces management overheads and processes. Automatically re-protects the data in the event of hardware failure.
- ★ **MatrixStore runs on Non-Proprietary Off-the-shelf hardware**
- ★ **99.999% Data Availability:** Hardware and data redundancy providing fail-over at every level.
- ★ **Scalable Capacity:** Start small and grow your MatrixStore cluster as your data grows.
- ★ **Self Managing :** MatrixStore manages the location, availability and protection of the data so you don't have to.

CertoStore proposed solution

- ★ No need for an additional backup process and administration
- ★ GRC compliant
- ★ Fully scalable up to Petabytes
- ★ OS and Hardware independent Java interface
- ★ MatrixStore also runs on HP Servers

Migration from EMC Centera SAP ArchiveLink / HTTP Content Server is possible
